

# Velocity Error Corrector

## VEC 1200 & 2000

CMC's Velocity Error Corrector is ENGINEERED to maximize the performance of your existing quadruplex VTR's.

- Applies Velocity Error Correction to all active lines of a head pass
- Plug compatible with VR1200 and VR2000 VTR's
- Improves interchange playback signal of standard and non-standard recordings
- Selectable automatic or manual first and last lines correction
- Extends useful quad head life
