

**Merlin
ME-68 High Speed
Color Duplicating System**

A new approach to quality quad tape duplication

There is a different approach to high speed quad tape duplication... a single master VHS and 200 duplicate master full size reels.

Each system has been designed and built by Merlin by Videotape in Redwood City, California. Complete ME-68 systems which are recommended to include both master control panel, the Merlin precision operation of master and all above from a single position. The master control panel incorporates a single photoelectric distance measurement to also serve each tape position.

The quantity and quality of tape produced at Videotape demonstrates the value of this unique duplication of quad tapes in part of your operation. Merlin can design and build a system to fit your needs. All ME-68 duplicating systems are custom designed to meet your requirements.
